

# NAMES and FACES

## The Awards Banquet

DICK ROG, an Associate Member, won the award for having recruited the most members during the past year. Dick and his wife, Sylvia, were guests of the Society for dinner and, in addition to his award certificate, Dick won a year's free membership. (You, too, can compete for this award—just have all the members you recruit mention your name on their membership application).

DICK TRUAX and LOU GRONHEIM accepted the award to the Kidney Foundation of the Upper Midwest for their assistance with the Refresher Course in the Basic Sciences of Dialysis.

SAM HUNTER, M.D. (better known as Ed Berger's Chief) accepted the award to Frank Quattlebaum, M.D., and the Greater Saint Paul Division of the Minnesota Heart Association for their assistance with the Refresher Course in the Basic Sciences of Oxygenation.

CHRIS FRYE and DIETZ VAN DURA again this year received the Journal Award. This certificate is given to those members of the Board of Associate Editors who have contributed the most to the quality and progress of that publication.

ED ROMANOWSKI received a bound edition of Volumes I and II of the Journal from the publisher as a memento of his office as Vice President for Information. The duties of this office include the Journal and the Annual Conference.

HENRY BEY was awarded a similar bound edition of Volumes I and II of the Journal for his efforts in the development of a course in Nephrology Technology. It is outlined elsewhere in this issue.

R. A. CREPEAU, SR., President of Ramco Publishing Company and publisher of the Journal of Extra-Corporeal Technology, was awarded a desk set which bore the inscription, "For the AmSECT Journal-Thank You". In addition, he received an honorary lifetime membership in the Society for himself and Ramco Publishing.

KATHRYN HARGESHEIMER, President of AmSECT, received a sterling silver vase as a gift from the members. It was inscribed, "For your devoted service - Thank you".

LEORY FERRIES was, once again, outstanding as Master of Ceremonies and it is hoped that he will continue to serve in this capacity for many more Awards Banquets.

JIM FONDUEX, our Secretary/Treasurer, opened the ceremonies by making special AmSECT members of DICK, NANCY, and MARY SHARON BERGER. He also presented gifts to AUDREY and ED BERGER for the family's efforts in handling the chores of the national office during the past year.

Roses were presented by Jim, on behalf of the Society, to our re-elected President, KATHRYN HARGESHEIMER, the newly-elected Chairwoman of the Ethics Committee, EMILY TAYLOR and to Kathryn's daughter, KATHY HARGESHEIMER.

The President, Kathryn Hargesheimer, and the entire attendance of the Ninth International Conference on Extra-Corporeal Technology would like to extend a very large and heartfelt "THANK YOU" to all of the SPEAKERS and EXHIBITORS who gave so generously of their time and efforts during the 1971 Conference. This meeting boasted a record attendance as well as a record number of exhibits, due in no small way to the program planned and the quality of the individuals who had so kindly consented to speak. It is to their credit that all previous records were broken!

## Come Fly With Us

Join your colleagues for eight days and seven nights in Hawaii.

1. Round trip air fare non-stop from Minneapolis-St. Paul aboard a Western Airlines Boeing 707 with first-class leg-room for everyone! Of course, the fare includes in-flight meals and an open bar—all with a Hawaiian flare!
2. A lei greeting upon arrival.
3. Transportation between hotels and airports
4. FIVE nights accommodations on Waikiki.
5. Three tours of the Honolulu area, Mount Tantalus, the Punchbowl, and Waikiki.
6. Round trip air fare to the island of Kauai.
7. Wailua River tour on Kauai, including the Fern Grotto.
8. Two Mai-Tai parties, evenings of arrival and departure.
9. TWO nights accommodations on Kauai.
10. All tips, taxes, service and administration charges.

*This tour package will depart on February 8th at 8:20 a.m. The total cost of the package is \$350 per person for all members, their families, the doctors for whom they work, and their hospital administrators. Send your reservation today!*

## BOOK REVIEW

### ADVANCES IN BIOMEDICAL ENGINEERING AND MEDICAL PHYSICS, Volume 4

S. N. Levine, Editor

John Wiley & Sons, Inc., Publishers, 236 pages; \$13.95

This volume is composed of four monographs: Holography Applied to Biomedical Research by Ernest Feleppa; Orthotopic Cardiac Prosthesis for Two-Stage Cardiac Replacement by Denton A. Cooley, Domingo Liotta, and Bruno J. Messmer; Electrochemical Methods for Analysis of Enzyme Systems; by Gary D. Christian; The Artificial Kidney by Yukihiko Nose.

Of particular interest are the second and fourth. Dr. Cooley, et al, discuss the problems to be overcome in the development of a total cardiac prosthesis and the indications for its use. In addition, they discuss cardiac transplantation and give the history of a patient who underwent the two-stage procedure for cardiac replacement. Dr. Nose gives a short history of dialysis then goes on to give a detailed analysis of all present techniques for substituting for renal function. The papers on holography and enzyme analysis are likewise very complete and very well explained. If you have an interest in any of these topics, this volume will be a welcome addition to your library.
