

1987 *Journal* Topic Index

A

acid base balance 12-15, 274-280
activated clotting time 36-38, 265-267, 348-351, 358-364
agglutinin, cold 290-296
air emboli
 detection 406-407
 micro 297-304, 352-357
 treatment 207-208
anticoagulation, management 265-267, 408-411
aorta, cross clamp 231-232
artificial heart 95-99, 180-182

B

blood
 autologous 186-189
 homologous 186-189
blood flow
 coronary 134-138
 determination 135-137, 161-169, 170-175, 221-227, 365
 management 119-122, 376
blood gas
 analysis 322-329
 management 352
blood trauma 312-315
 mechanical 316-321
blood utilization 186-189, 352
book review 241
bypass, venovenous 268-273

C

calcium, ionized 322
cannulation
 aortic 1, 80-88, 101-102, 191
 venous 27, 101-102, 191, 372-275
carbon dioxide, transport 32-33, 103-109, 177-178
cardioplegia
 administration 19-22, 27-29, 231-232, 415-419
 crystalloid 19-26
 hypothermic 290-296, 305-311, 415-419
 oxygenated 245-257
case report 3-4, 16-18, 228-230, 372-375, 412-414
chemotherapy 190-194, 338-347
comparison
 membrane oxygenator 297-304
complement, activation 156-160
complication 1-4
 cerebral 274-280
 CPB 236, 369-371, 392-398
 hematologic 46-49

oxygenator 330-337
surgical 372-375
thrombocytosis 36-38

computer 408-411
 assessment 30-35

CPB

 complication 1-4
 infant 352-357
 management 287-289
 monitoring 288-289
 neonatal 16-18
 pediatric 100-101
cytotoxic drugs 39-40

D

dialysis 17
dissection, retrograde 1-4
disseminated intravascular coagulopathy 9-11

E

emboli, gaseous 71-74, 80-88
emergency pump 228-230
equipment
 CPB 235-240
 safety 365
extracorporeal circulation, long term 16-18

F

fibrinolysis 9-10
filter, arterial 123-133
FiO₂ 105-108
flowmeter, electromagnetic 161-169

G

gas transfer, oxygen 330-338

H

heat exchanger, performance 64-70
heat transfer, extracorporeal 33-34, 64-70
hematocrit 115-118, 161-168, 186-189
hemodilution 115, 145-148, 291-296, 352-257
hemolysis 213, 281-286, 312-315, 316-321
hemostatis 5-11, 36
heparin
 beef lung 183, 369
 reversal 348-351, 358-364
hyperthermia 39-42, 338-347

hypothermia
 complications 1, 290-296
 effects 170-175
 profound 119-122

I

IABP 27-29, 59-63, 139-144
IABP, monitoring 140
infant 245-257

M

malignant melanoma 39
myocardial preservation 245-257
myocardial protection
 hypothermic 19-20, 24-25, 27-29, 305-311

N

nitroglycerine 369-371

O

oncotic pressure 145-148
osmotic pressure 23, 145
oxygenator
 bubble 46, 48, 157, 209, 259, 274
 comparison 156-160, 209-215, 258-264, 274-280
 membrane 16, 46, 103-109, 157, 209, 259, 274, 297, 312-315
oxygen free radicals 245
oxygen transport 121-122
oxygen transport, calculated 32, 75-79, 91-94
oxyhemoglobin saturation, calculated 326

P

pCO₂ 14-15, 103-108, 176-179, 322-329
pCO₂, monitoring 177
perfusion
 extremity 38-42, 338-347
 isolated
 heart 305-311
 lung 190-194
 pulsatile
 assist device 60-61, 71-74
 flow 60-61, 297-304
 membrane oxygenator 297-304
 research 384-391
 survey 384-391
perfusionist
 training 181, 216-220, 384-391
 role 236-238
pH 13-15, 322-329
platelet, adhesion 258-264
platelet count 43-46, 312-315

platelets 183
Pluronic F-68 43-46,
pO₂ 80-85, 105-109, 116, 149, 213, 322-329
pO₂, monitoring 149-155
potassium 19, 23, 322, 415-419
pressure, arterial line 2, 72-73, 376-357
prime extracorporeal circuit 352-357
prostacyclin 183-185, 258-264
protamine 348
protamine: heparin ratio 348-351, 358-364
pump
 pulsatile 297-304, 376
 roller 207, 297, 365, 376
 vortex 207, 268-273, 316-321, 365, 406

R

renal function 3
roller pump 123, 170-175

S

safety, perfusion 236, 330-338, 392-398
scanning electron microscope 47-58, 123-133
steroid therapy 89-91, 156-160
systemic vascular resistance 89-94

T

technique
 anticoagulation 36-38, 265-267, 408
 cannulation 27, 372
 cardioplegia 19-22, 23-26, 231-232
 computer assisted 30-35
 monitoring 236-237
 safety 392-398, 406-407
temperature
 blood 150
 myocardial 20, 24, 29, 415-419
 variation 170-175
temperature correction, blood gas 153-155
thermodilution method 221-227
thromboxane 44-46
transplantation
 cardiac 305-311
 liver 268-273
tubing, damage 123-133
tubing, extracorporeal 170-175

U

ultrafiltration, blood 281-286

V

ventricular assist, left 372-375
viscosity 89-91
