## Letter to the Editor

---

Dear Editor:

Apologies are in order to the readers of the *Journal of Extra-Corporeal Technology*. Upon reading over a copy of my recent article, "A Review of the Literature on Pulmonary Artery Balloon Counterpulsation and a Successful Application of Concomitant Balloon Counterpulsation," published in the Fall 1988 issue 20(3):92-95, I discovered an unwitting error in the text which may have confused some readers. The second sentence of the second full paragraph on Page 93 should actually read: "Jett et al (11, 12) showed that PABCP was able to increase CO by 39%, etc . . ."
