

Retraction Notice

Heath M, Yalamuri S, Walker J, et al. Cold Agglutinin Autoantibodies in a Patient without a Visible Coronary Sinus Ostium: Strategies for Myocardial Protection with Using Retrograde Cardioplegia. *J Extra Corporl Technol.* 2016;48:79–82. PMID:27578898 PMCID: PMC5001525.

It was brought to my attention that a published article in *JECT* was very similar to an article published in the February 2017 issue of the *Journal of Cardiothoracic and Vascular Anesthesia (JCVA)* entitled “Cardiopulmonary Bypass Management Complicated by a Stenotic Coronary Sinus and Cold Agglutinins”. The two articles were from the same group with the *JECT* article emphasizing more of the perfusion techniques. Despite the different emphasis, further review by the editors of both journals determined that the articles overlapped sufficiently to be considered the same. Although the article in *JCVA* was published after the one in *JECT*, the *JCVA* article was submitted before the *JECT* article. For these reasons the editor has retracted the Heath et al. article from *JECT*.
